

A glowing white icon of a microchip with 'Ai' written on it, surrounded by a circular digital interface with various icons like a globe, a brain, and a cloud.

DISCOVER OPKEY

Your Path to
Effortless Test
Automation

A hand is shown holding a glowing AI chip icon, with various digital icons floating around it.

opkey

OpKey, an advanced test automation platform, ensures comprehensive automation across 14 packaged applications and 150 technologies. Embrace no-code automation with OpKey's intuitive drag-and-drop interface, empowering non-technical users to build robust tests effortlessly.

**OPKEY,
YOUR
KEY TO
REDEFINE
TESTING
EXCELLENCE**

- Get access to 30,000+ pre-built test cases across 14 applications for quick scalability.
- OpKey's AI-driven impact assessments and reusable automation facilitate seamless migrations for Oracle, SAP, MS Dynamics, and more.
- It enables Omni-channel Testing across On-Premises, Cloud, and mobile platforms with multi-browser support.
- Reduces your IT maintenance costs by 75% or more through reduced test volume and automation of manual tasks.
- OpKey's autonomous testing fosters 50x more frequent deployments, maximizing your ERP systems' potential.

How OpKey Stands out?

Certainty in Cloud Updates:

Guarantees 3-day certification for each cloud update, ensuring uninterrupted business continuity.

Rapid Test Execution: OpKey's Virtual Machines execute tests 8X faster, enabling certification of quarterly updates in just 3 days.

Streamlined UAT: Automates User Acceptance Testing, allowing end-users to focus on high-value tasks.

10X Faster Testing: Speeds up your Release Cycles enabling changes that keep pace with your business.

Risk Reduction: It avoids over 90% of potential risks, safeguarding your business from disruptions during ERP change cycles.

Problems Solved by OpKey for Oracle Cloud Customers:

01 OpKey identifies Test Coverage Gaps, recommending tests based on historical data and common deviations.

02 Leverage about 5,000+ Pre-Built Tests and no-code builder to create tests in minutes, boosting coverage instantly.

03 Its Impact Analysis Reports, and self-healing scripts streamline test maintenance, reducing efforts by 80%.

04 Automates User Acceptance Testing, freeing end-users from routine tasks and enabling them to focus on strategic activities.
