## INVOICEbackup

The smarter way to collate and send invoices in E&C

In industries like E&C and IT Services invoicing isn't just about the numbers—it's about the documentation. Time logs, expense sheets, purchase orders, and other backup data are essential to validate and process AR invoices. Managing this manually is inefficient, error-prone, and often delays payment.

Rite's Invoice Backup solution automates this entire process—collating all billing-relevant documentation into a single, organized format attached with the invoice. Built using Oracle PaaS on Oracle Fusion, the solution simplifies billing operations and ensures complete, accurate, and timely submissions to clients.

# Key Features

Automated Backup Document Attachment

Generates & compiles all invoice-related documents into one zip folder

Flexible Invoice Format Generation

Supports the generation of multiple invoice formats with corresponding backup documentation.

Built on Oracle PaaS for Oracle Fusion

Leverages Oracle's PaaS capabilities for seamless and scalable deployment within the Oracle Fusion ecosystem.

01

Streamlined Invoicing

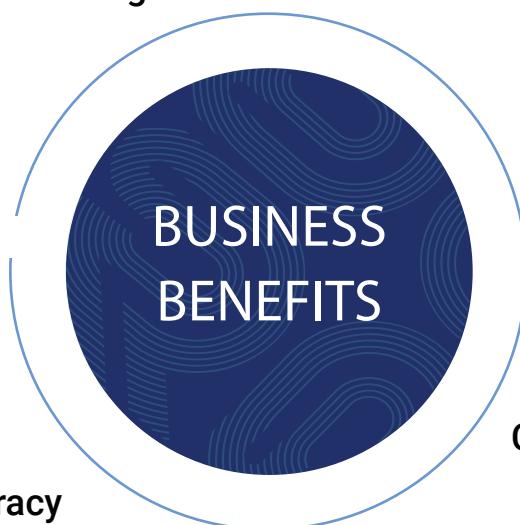

02

Improved DSO

03

Increased Accuracy

04

Enhanced Documentation

05

Consistent Formats
