

● CONFIGURATION MIGRATION

Configrite

Migrate and compare Oracle setups with confidence.

Moving configurations across DEV, TEST, UAT and PROD by hand leads to missed changes, manual rework and setups that do not match. ConfigRite moves setups between EBS and Fusion or Fusion and Fusion, compares instances and reports every mismatch, with AI-assisted comparison showing exactly what changed.

45%

faster conversion cycles

1 click

config migration across PODs

4

environments compared, DEV to PROD

2

sources with prebuilt queries: EBS and Fusion

● HOW IT WORKS

01

Extract setups

From EBS or Oracle Fusion with prebuilt, plug-and-play queries.

02

Compare instances

At functional-area or task level to see exactly what differs.

03

Confirm the changes

Automated mismatch reports before anything moves.

04

Validate the target

So the right data reaches the right place, not just a success flag.

05

Deploy in one click

Across PODs, from dev to UAT to prod.

06

Patch analysis

See how an Oracle Fusion patch can affect existing setups.

07

Copy configurations

Duplicate a configuration for a new entity within the same pod.

08

Generate config worksheet (BR100)

Automatically produce the BR100 configuration worksheet.

● WHY CONFIGRITE

ConfigRite gives teams visibility into configuration differences before deployment, reducing missed changes, manual validation and rework.

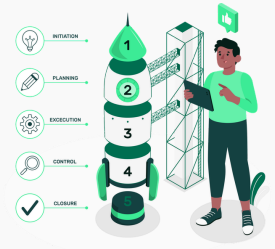

- ✓ Identify configuration changes before they cause deployment issues
- ✓ Compare environments at functional-area or task level
- ✓ Reduce manual setup validation across DEV, TEST, UAT and PROD
- ✓ Move configurations through environments with less rework
- ✓ Improve confidence that target setups match what was intended

● WHERE AI HELPS

AI-assisted comparison highlights additions, modifications and deletions for review.

FEATURES

Everything you need to manage setups. In one place.

01

Fusion instance comparison

Compare configurations between two Fusion instances before deployment and see what changed.

02

Mismatch report validation

Generate mismatch reports to confirm everything aligns across instances.

03

One-click config migration

Migrate configurations across PODs instantly, without manual effort.

04

Built-in Oracle adaptors

Connect directly to Oracle EBS and Fusion for faster setup.

05

End-to-end lifecycle

Extraction through load in one workflow, with extensive mapping for complex scenarios.

**Less time validating setups.
More time shipping releases.**

SECURITY, GOVERNANCE AND SCALE

Oracle security carried through

SSO and OAuth login. Fusion RBAC inherited, audit trail preserved on every promotion.

Verified accuracy

ConfigRite confirms the right data reached the target system, not just that a job finished.

Human-in-the-loop by design

Autonomy thresholds decide which setup differences the agent applies alone.

EBS to Fusion, Fusion to Fusion

Both paths supported, with the same comparison and validation on each.

Ready to experience ConfigRite?

Bring two of your environments. We will run a comparison and show what ConfigRite finds.
