

EXCEL TO ORACLE FUSION

ConvertLite

Load Oracle Fusion data straight from Excel.

Everyday SCM, Finance and HCM loads should not wait on IT for templates, scripts and fixes. ConvertLite lets business users validate and load data from Excel into Oracle Fusion in minutes, with the same AI validation library that powers ConvertRite.

50%

faster uploads than manual entry

90%

data accuracy with validation checks

40%

less effort for everyday users

Hours

to adopt, with an Excel-friendly design

HOW IT WORKS

01

Prepare data in Excel

Using the columns your team already works with.

02

Validate before upload

Instant checks and plain error messages against Fusion.

03

Load SCM, FIN and HCM objects

Directly into Oracle Fusion in minutes.

04

Download and verify

Pull data back from Fusion to confirm accuracy.

05

Adjust and reload

Without IT help when requirements change.

WHY CONVERTLITE

ConvertLite puts everyday Oracle data loading in familiar Excel workflows, with fewer errors and less IT dependency.

- ✓ Reduce dependency on IT for everyday data loads
- ✓ Validate data before it reaches Oracle Fusion
- ✓ Work with familiar Excel-based preparation workflows
- ✓ Correct and reload data without rebuilding processes
- ✓ Improve accuracy through shared Oracle validation logic

WHERE AI HELPS

AI-supported checks help stop incomplete or invalid data before upload.

FEATURES

Everything for everyday loads. In Excel.

01

Excel-based data loads

Prepare, validate and upload data to Oracle Fusion directly from Excel.

02

Instant validation checks

Spot errors with clear messages before upload, using built-in validations.

03

Download and verify

Pull data back from Fusion to confirm accuracy and completeness.

04

Flexible column control

Add, remove or adjust columns to match business needs without IT help.

05

Fast, lightweight utility

Simple to adopt, easy to maintain, built for business users to get work done quickly.

Less time on templates.
More time on the business.

SECURITY, GOVERNANCE AND SCALE

Oracle security carried through

Fusion RBAC and data security are inherited. Every load is logged with a full audit trail.

Adoption in hours

Excel-friendly design means teams start loading the day it is deployed.

Human-in-the-loop by design

Autonomy thresholds decide which corrections the agent makes alone and which it asks about.

Affordable and flexible

A cost-effective option with the right features, without heavy tools or hidden costs.

Ready to experience ConvertLife?

Bring a spreadsheet you load today. We will show it going into Fusion in minutes.
