

CREW TIME AND PAYROLL

Crewrite

Crew time tracking built for the field.

Most timekeeping tools are built for one person entering one timesheet. Construction crews do not work that way. CrewRite lets supervisors record hours for whole crews in one go, validates entries instantly and syncs with Oracle OTL, PPM and HCM, with AI-assisted approvals and exception routing.

30–40%

less payroll processing time

Near 0

time entry errors

1 click

time entry for a whole crew

3

Oracle modules in sync: OTL, PPM, HCM

HOW IT WORKS

01

Capture time by crew

Badge-in, badge-out and one-click entries for the whole team.

02

Apply the right rules

Overtime, per diem, shift differential and geo location, automatically.

03

Route for approval

Through your supervisory hierarchy, with exceptions handled per business unit.

04

Sync to Oracle

OTL, PPM and HCM in real time through built-in OIC integration.

05

Bill from approved time

Timesheets attached automatically as billing backup.

WHY CREWRITE

CrewRite simplifies field timekeeping, so payroll, project and billing teams receive accurate, validated hours faster.

- ✓ Capture hours for entire crews in one action
- ✓ Apply overtime, per diem and shift rules consistently
- ✓ Reduce payroll processing time and time-entry errors
- ✓ Keep project, HR and billing data synchronised
- ✓ Attach approved time automatically as billing backup

WHERE AI HELPS

AI agents approve compliant timesheets and route exceptions with reasons.

An AI agentic app: knowledge base, prompt and policy library, autonomy framework and evaluation harness.

FEATURES

Everything for crew time. In one place.

01

Timekeeping module

Primary and secondary timekeepers, client badging and biometric integration.

02

One-click crew entries

Entries for entire crews including per diem, incentives, overtime and shift differentials.

03

Smart exception handling

PTO, holidays, billable training and weekends managed per business unit, with client approvals.

04

Version-controlled timesheets

Historical timesheets kept for compliance, audit tracking and accurate records.

05

Crew-based planning

Plan and assign tasks to crews within Oracle Projects so everyone knows what to do and when.

**Less time on timesheets.
More time on the job.**

SECURITY, GOVERNANCE AND SCALE

Runs inside Oracle Fusion

Built on Oracle AI Agent Studio, so CrewRite inherits Fusion RBAC and data security.

Approvals preserved

Your supervisory hierarchy and audit trail carry through. The AI works within them.

Human-in-the-loop by design

Per-agent autonomy thresholds decide which timesheets the agent approves alone.

Built-in OIC integration

Real-time sync with OTL, PPM and HCM keeps time, HR and project data aligned.

Scales to large field crews

Designed for distributed workforces across many job sites and business units.

Ready to experience CrewRite?

Bring a real crew and a real pay rule. We will show the timesheet go from badge-in to billing backup.
