

EQUIPMENT MANAGEMENT

Equiprite

Every machine requested, tracked and billed.

Owned, rented or shared, equipment on E&C projects is requested in one place, tracked in another and billed by hand. EquipRite brings the whole equipment lifecycle into Oracle Cloud, with AI helping optimise rates and reallocate idle assets.

1

portal for requests, assignment and billing

4

Oracle modules integrated

Live

location, status and usage

Auto

billing from equipment status

HOW IT WORKS

01

Request equipment

Through a single portal tied to project tasks.

02

Assign and deploy

Real-time status and location for every asset.

03

Track usage

Across working hours, downtime and maintenance states.

04

Bill at the right rate

Usage-specific rates and customer discounts applied automatically.

05

Account in Oracle

Charges pushed straight into Project Accounting.

WHY EQUIPRITE

EquipRite connects equipment operations and project finance, improving asset utilisation, billing accuracy and cost visibility.

- ✓ See equipment status, location and usage across projects
- ✓ Reduce idle equipment and missed rental opportunities
- ✓ Apply rates based on actual equipment usage
- ✓ Connect maintenance and project planning data
- ✓ Improve project cost accuracy and billing speed

WHERE AI HELPS

AI agents identify idle assets and recommend or hold reallocations.

An AI agentic app: knowledge base, prompt and policy library, autonomy framework and evaluation harness.

FEATURES

Everything for equipment management. In one place.

01

Dynamic billing logic

Usage-specific rates for working hours, downtime, maintenance and equipment states.

02

Unified equipment view

Specifications, maintenance logs and asset data on one screen.

03

Real-time availability monitoring

Location, status and usage for every asset across projects and sites.

04

Rental and discount support

Customer-specific discounts, variable-rate billing and rental terms applied automatically.

05

Maintenance tracking

Schedules, asset condition and preventive maintenance to reduce downtime.

Less idle equipment.
More predictable margins.

SECURITY, GOVERNANCE AND SCALE

Runs inside Oracle Fusion

Built on Oracle AI Agent Studio. Fusion RBAC and data security are inherited.

Approvals preserved

Equipment requests and billing follow your approval hierarchy with a full audit trail.

Human-in-the-loop by design

Autonomy thresholds decide which reallocations the agent makes alone.

Oracle-ready integration

PPM, HCM, Projects and Receivables through built-in OIC.

Automated accounting

Charges post directly into Oracle Project Accounting, reducing manual errors.

Ready to experience EquipRite?

Bring your fleet list. We will show a request go from assignment to billed usage.
