

PROJECT PROCUREMENT

Procure **rite**

Procurement that follows the project plan.

On E&C projects, materials have to land against specific tasks. Tracking requisitions, RFQs, POs, inspections and vendors across all of them is where schedules slip. ProcureRite plans and tracks procurement at task level inside Oracle Cloud, with AI helping expedite at-risk procurement before delays grow.

25–35%

faster procurement cycles

1

screen for RFQs, POs and receipts

3

Oracle modules integrated

Task

level material planning and tracking

HOW IT WORKS

01

Plan materials against tasks

Design specifications attached for vendors.

02

Initiate RFQs and POs

From the same screen, without switching modules.

03

Coordinate vendors early

Schedule source inspections before materials ship.

04

Track every PO in real time

See bottlenecks as they form.

05

Receive and return

Item-level costing and movement across the project.

WHY PROCURERITE

ProcureRite connects procurement activity to project execution, so teams see material risks early and keep deliveries on schedule.

- ✓ Plan materials against specific project tasks
- ✓ Reduce manual tracking across RFQs, POs and deliveries
- ✓ Identify procurement bottlenecks as they develop
- ✓ Coordinate vendors and inspections earlier
- ✓ Improve material availability and project cost visibility

WHERE AI HELPS

AI expedites at-risk POs or proposes schedule changes.

An AI agentic app: knowledge base, prompt and policy library, autonomy framework and evaluation harness.

FEATURES

Everything for project procurement. In one place.

01

Project-centric procurement

Plan and track materials against project tasks with built-in task mapping.

02

Single-screen control

Create and manage RFQs, POs, receipts and returns in one interface.

03

Real-time PO tracking

Monitor progress and identify bottlenecks instantly.

04

Early vendor coordination

Attach design specs, schedule inspections and collaborate before materials arrive.

05

Item-level visibility

Drill into material movement and costing across the project lifecycle.

**Less chasing purchase orders.
More materials on time.**

SECURITY, GOVERNANCE AND SCALE

Runs inside Oracle Fusion

Built on Oracle AI Agent Studio. Fusion RBAC and data security are inherited.

Approvals preserved

Procurement approvals follow your hierarchy with a full audit trail.

Human-in-the-loop by design

Autonomy thresholds decide which expedites the agent triggers alone and which it escalates.

Native Oracle integration

Oracle Procurement, Projects and PPM for data accuracy.

Eliminates manual PO entry

Speeds supplier coordination and streamlines procurement workflows.

Ready to experience ProcureRite?

Bring a project plan and its bill of materials. We will show procurement run from RFQ to receipt.
